INDUSTRIAL EXHAUST STACKS

IVI has designed, fabricated and installed exhaust stacks for foundries, pollution control, pulp and paper, and automotive industries throughout North America. We are capable of producing stacks of any diameter and height in a variety of steel, including carbon, stainless and HSLA.

IVI CAPABILITIES

- Engineer, manufacture and install any size or dimension stack
- Engineer and design foundation requirements
- Design in accordance with the provisions of ASTM STS-1, 1BC, and ASCE-7 for all applicable wind and seismic requirements
- Configure to needed exit velocity requirements, wind shearing and ventilation needs

IVI'S STACK DESIGN

We ensure your industrial stack complies with air quality regulations, modeling requirements and code stipulations by considering:

- Air Volume
- Location
- Configuration
- Air Temperature
- Testing
